COURSE SYLLABUS

Course name: Hygiene and Housing of Animals

Academic year 2018-19 IV. (summer) semester

Course leader: Kristina Matković, DVM, PhD, Full Professor

Teachers: Gordana Gregurić Gračner, DVM, PhD, Associate Professor,
Mario Ostović, DVM, PhD, Assistant Professor

Assistant: Ivana Sabolek, DVM, junior research assistant

First day of classes: 25. 02. 2019.

Last day of classes: 10. 05. 2019.

Timetable for LECTURES academic year 2018-2019

LECTURES				
Date	Methodological unit	Teacher	Location / time	Literature
25.2.2019.	Hygiene of cattle accommodation and housing	Kristina Matković	Lecture Room Department of Veterinary Pathology 10-12h	see list of literature
26.2.2019.	Hygiene of pig accommodation and housing	Mario Ostović	Lecture Room, Department of Physiology and Radiobiology 8-10h	see list of literature
27.2.2019.	Hygiene of poultry accommodation and housing	Kristina Matković	Lecture Room, Department of Physiology and Radiobiology 10-12h	see list of literature
28.2.2019.	Herd health in the context of animal housing and welfare	Kristina Matković	Lecture Room, Department of Pharmacology and Toxicology 10-12h	see list of literature
1.3.2019.	Hygiene of pet and laboratory animal accommodation and housing	Gordana Gregurić Gračner	Lecture Room Department of Veterinary Pathology 10-12h	see list of literature
5.3.2019.	Animal faecal matter	Mario Ostović	Lecture Room Department of Veterinary Pathology 8-10h	see list of literature
11.3.2019.	Hygiene of horse accommodation and housing	Gordana Gregurić Gračner	Lecture Room Department of Chemistry and Biochemistry 12-13h	see list of literature

Timetable for SEMINARS academic year 2018-2019

SEMINARS					
Date	Methodological unit	Teacher	Group	Location / time	Literature
1. 3.2019.	Herd health in the context of cattle production	Kristina Matković		Lecture Room Department of Veterinary Pathology 12-14	Handout
4. 3. 2019.	Herd health in the context of sheep and goat production	Mario Ostović		Lecture Room, Department of Physiology and Radiobiology 8-10	Handout
6. 3. 2019.	Herd health in the context of pig production	Mario Ostović		Lecture Room Department of Chemistry and Biochemistry 14-16	Handout
7. 3. 2019.	Herd health in the context of poultry production	Kristina Matković		Lecture Room Department of Pharmacology and Toxicology 8-10	Handout
8. 3. 2019.	Hygiene of poultry accommodation and housing (turkeys, geese, ducks); ostrich egg incubation	Gordana Gregurić Gračner		Lecture Room Department of Chemistry and Biochemistry 8-10	Handout
12. 3. 2019.	Repetitorium and colloquium	all teachers		Lecture Room Department of Chemistry and Biochemistry 8-10	Handout
13. 3. 2019.	Hygiene of fur animal accommodation and housing (otter, chinchilla, nutria)	Gordana Gregurić Gračner		Lecture Room Department of Veterinary Pathology 13-15	Handout
14. 3. 2019.	Animal faecal matter (composting, biogas)	Mario Ostović		Lecture Room Department of Chemistry and Biochemistry 13-15	Handout
18. 3. 2019.	Laboratory animals (biological and ecological characteristics)	Gordana Gregurić Gračner		Lecture Room Department of Chemistry and Biochemistry 12-14	Handout

2018-2019

19. 3. 2019.	Biosafety measures at farms	Kristina Matković		Lecture Room Department of Chemistry and Biochemistry 9-11	Handout
20. 3. 2019.	Repetitorium and colloquium	all teachers		Lecture Room Department of Veterinary Pathology 10-12	Handout

Timetable for PRACTICALS academic year 2018-2019

PRACTICALS						
Date	Methodological unit	Teacher	Type of practical	Group	Location / time	Literature
15.3.2019.	Measurements of microclimate parameters and evaluation of accommodation and housing hygiene for particular animal species and categories	Mario Ostović	field		Farm / departure at 10 am in the front of the Clinic of Internal Diseases	Handout
22.3.2019.	Measurements of microclimate parameters and evaluation of accommodation and housing hygiene for particular animal species and categories	Mario Ostović	field		Farm / departure at 8 am in the front of the Clinic of Internal Diseases	Handout
12.4.2019.	Measurements of microclimate parameters and evaluation of accommodation and housing hygiene for particular animal species and categories	Gordana Gregurić Gračner	field		Farm / departure at 10 am in the front of the Clinic of Internal Diseases	Handout
10.5.2019.	Measurements of microclimate parameters and evaluation of accommodation and housing hygiene for particular animal species and categories	Kristina Matković	field		Farm / departure at 10 am in the front of the Clinic of Internal Diseases	Handout

STUDENT OBLIGATIONS

Lecture attendance	During the two semesters, the student must be present at 15 hours of lectures to get minimal 3 credits. An achievable maximum point in this element is 6.
Seminars attendance	During the semester, the student must be present at 15 hours of seminars to get minimal 4 credits. An achievable maximum point in this element is 6.
Practicals attendance	During the two semesters, the student must be present at 28 hours of practical's to get minimal 4 credits. An achievable maximum point in this element is 6.
Active participation in seminars and practicals	Activity in the practical's and seminars shall be graded as follows: for two correct answers during practicals (each answer is worth 2 points) (III semester, 4 points); To create a seminar paper achieves additional 2 points. If the seminar held at the Power Point, the student achieves an additional 2 points. (IV semester – 4 points,); Creating reports from field practical's (IV semester) 8 points, total 12 points
Final exam	Minimum conditions for the passage of the first, second, third, fourth and fifth evaluation elements will be aggregated and must amount to 36 credits. To access the final exam, students need to realize those 36 points. The final exam will be conducted in the form of a written exam, which consists of 8 questions (2 points to "sufficient" response on the question, 3 points for a "good" response on the question, 4 points for "very good" response on the question, 5 points for "excellent" response on the question). With the total of 40 collected points the student will achieve a maximum of 40 points. For a minimum 24 points, a student must collect 24 points out of this element.
Examination requirements	Student requirements are defined in the Regulations on the Integrated Undergraduate and Graduate Study of Veterinary Medicine. Given the above, the student must acquire a minimum number of points from all assessment elements in order to take the final exam. Article 45: a student can justifiably be absent from up to 50 % of the lectures; 30% of the seminars and 30 % of the exercises.

GRADING AND EVALUATING STUDENT WORK

Continuous knowledge-checking (mid-terms)	First colloquium 12.3.2019. Second colloquium 20. 3.2019.
Final exams (dates)	18.3.2019, 22.5.2019, 17.6. 2019, 9.7.2019, 5.9.2019, 19.9.2019
Form of final exam	Written exam

OBJECTIVES AND LEARNING OUTCOMES

Course objectives	The objective of the course is to develop competences qualifying students for preservation of biological balance between the environment and the animal while exhibiting appropriate health state through optimal productivity and reproduction.
Learning outcomes	The course will enable the students acquire skills and knowledge qualifying them to ensure appropriate animal housing to prevent the occurrence of unfavourable conditions of housing environment that may compromise animal health, productivity and reproduction. In addition, students will acquire due knowledge about the methods of animal waste disposal to prevent environmental contamination, and on the role of veterinarian in animal care and transportation to prevent stress situations and health disturbance due to inappropriate transfer from one setting to another one, or because of poor animal hygiene. Sanitation plays a crucial role in preventive veterinary medicine; therefore the course will provide students with due knowledge and skills in the methods, types and effects of disinfection in preserving animal health as well as in the control of pest insects and rodents in the environment to prevent the spread of disease to humans and animals.

GRADING SCHEME

<i>Points</i>	<i>Grade</i>
Up to 59	1 (F)
60-68	2 (E)
69-76	2 (D)
77-84	3 (C)
85-92	4 (B)
93-100	5 (A)

Course leader:

Head of Department/Clinic:

Note: The course leader is required to submit a Course Syllabus to all teachers and associates pertaining to the Course.

GRADING AND EVALUATION OF STUDENT WORK ON COURSES WITH LECTURES, SEMINARS and PRACTICALS

Type of activity	Minimum number of points	Maximum number of points
Lectures attendance	3	6
Seminar attendance	4	6
Practicals attendance	4	6
Active participation in seminars and practicals	5	10
Continuous knowledge checking (mid-terms)	20	32
Final exam	24	40
TOTAL	60	100

GRADING AND EVALUATION OF STUDENT WORK ON COURSES WITH LECTURES and SEMINARS

Type of activity	Minimum number of points	Maximum number of points
Lecture attendance	3	6
Practicals attendance	8	12
Active participation in practicals	5	10
Continuous knowledge checking (mid-terms)	20	32
Final exam	24	40
TOTAL	60	100

GRADING AND EVALUATION OF STUDENT WORK ON COURSES WITH SEMINARS and EXERCISES

Type of activity	Minimum number of points	Maximum number of points
Seminar / practicals attendance	11	18
Active participation in seminars and practicals	5	10
Continuous knowledge checking (mid-terms)	20	32
Final exam	24	40
TOTAL	60	100
