STUDENT OBLIGATIONS

Lecture attendance	-
Seminar attendance	-
Practical attendance	Student is obliged to attend all practical field visits with exception of one absence that needs to be reported on time and approved in Student Affairs Office. Such absence should obligatory be compensated in a way determined by course leader.
Active participation in seminars and Practicals	All students would be evaluated for each case. Complete case load would be documented in student notebook, that needs to be presented any time during field work and after it, when requested. All data in student notebook should be verified and signed by clinical teacher responsible for that specific case and practical work. Multidisciplinary and case oriented nature of this subject would include variable team of clinical veterinary surgeons, depending of case load. Clinical surgeons would involve all teaching staff from Clinic for obstetrics and reproduction, Clinic for internal diseases, Clinic for surgery, orthopaedics and ophthalmology and Department for microbiology and infectious diseases with clinics. Students are obliged in keeping high biosecurity and animal welfare standards according to previous knowledge from clinical subjects and according to strict instructions from course leaders
Final exam	-
Examination requirements	Student requirements are defined in the Regulations on the Integrated Undergraduate and Graduate Study of Veterinary Medicine. Student is obliged to attend all practical field visits with exception of one absence that needs to be reported on time and approved in Student Affairs Office. Such absence should obligatory be compensated in a way determined by course leader.

LITERATURE

Obligatory literature	Complete obligatory literature for all clinical subjects i.e. Reproduction of domestic animals, internal diseases of domestic animals , surgery, orthopedics and ophtalmology of domestic animals and infectious diseases of domestic animals (please see course description for each subject)
Additional literature	Complete additional literature for all clinical subjects i.e. reproduction of domestic animals, internal diseases of domestic animals , surgery, orthopedics and ophtalmology of domestic animals and infectious diseases of domestic animals (please see course description for each subject)

OBJECTIVES AND LEARNING OUTCOMES

<p>Course objectives</p>	<p>Multidisciplinary and case oriented nature of this subject would include variable team of clinical veterinary surgeons, depending of case load. Clinical surgeons would involve all teaching staff from Clinic for obstetrics and reproduction, Clinic for internal diseases, Clinic for surgery, orthopaedics and ophthalmology and Department for microbiology and infectious diseases with clinics. The aim of the subject is to give the students opportunity to gain clinical experience under field conditions and supervised by experts in each field. They should learn how Independently perform all diagnostic procedures including methods of clinical examination in conditions of field work. Taking samples from the live patients or cadavers which would enable material for all types of laboratory tests. Perform all obstetrical procedures that can be performed well in the conditions of fieldwork and routine gynecological and andrological exams for all aspects of clinical reproductive practice. Perform all surgical procedures adapted to conditions of fieldwork and thorough clinical examination of all kinds of internal diseases on farm.klinika“ .</p>
<p>Learning outcomes</p>	<p>Students would learn to independently and thoroughly apply knowledge and skills, including all diagnostic procedures, therapy options and client management under field conditions. Combined theoretical knowledge and practice form subjects “Clinical procedures”, “Internal diseases of domestic animals”, “Surgery, orthopaedics and ophthalmology”, “Reproduction and obstetrics” and “Infectious diseases”It is sublimation of already acquired knowledge and skills from preclinical and clinical subjects at the study of veterinary medicine. Opprtunity to apply already gained knowledge and skills under field conditions leads to boosting both professional competence and confidence of students. The main learning outcome should be acquiring the skills needed to perform the independent veterinary practices in the field condition.</p>
